

**Your Pathway To Fertility Is Clear
Walk With Me As I Show You The Way
Follow Where Others Have Gone...To Achieve Their Dreams Of Motherhood**

Did you realize:

Not all doctors are created equal. Some graduate from medical school—only to start an assembly line family practice. It's difficult to express your feelings when your doctor wants to move on to the next patient.

Hi, I'm Dr. Tina _____. Naturopathic doctor, specializing in fertility issues.

Would you like to see a doctor...that truly listens to your concerns? I believe in spending time with you. Getting to know you. Delving really deep to find the answers to your temporary infertility.

Like Chinese medicine, a Naturopathic doctor sees infertility issues in a different light. There are natural cures for the human body that come from thousands of years of wisdom. No drugs or surgery needed.

I too had difficulty becoming pregnant. My doctor quickly spelled out the reasons why I never would get pregnant to me. I left his office shaking my head. As I was somewhat stubborn and unwilling to listen to drivel, I set a goal. I would find out how to become pregnant on my own. Even I was shocked to find out there are only five reasons why a healthy woman cannot get pregnant.

Let me back up a bit and tell you my story.

When I was fifteen and growing up in a small town, the family doctor was like a king. My parents believed 100% in his wisdom. Surprisingly they allowed him to put me on birth control. Why? He told them it would regulate my abnormal menstruation. I wasn't even sexually active. When I told my girlfriends, they laughed and said I had a green pass to go. That just wasn't my style though. I was serious student even at fifteen.

I stayed on the pill right into University. Somehow it didn't seem to be making sense. Reading up on these issues at the library, I became concerned. So I went to see my Endocrinologist

This Can't Be Right. Let's Try Something More Natural

When I told him that I didn't want to stay on the pill and tried to explain, he stopped me. He looked downright puzzled. "So why are you here then," he inquired. I noticed that he already had his hand on the prescription pad. I thanked him for his time and left.

Doing what comes natural for me, I continued to research on my own. When I wasn't doing school work, I spent time with children. I love kids. It gave me great joy to teach piano, figure skating and art. The smiles were worth it.

Desperate to have my own...my research and study led me to become a Naturopathic Doctor.

Creation—The Greatest Joy In the Universe

Everything finally paid off. All the long hours of research came to fruition in my last year of University. I became pregnant. Knowing that I had come across secrets, I kept my diaries under lock and key. Finishing my last year was difficult. Dreams of motherhood and sharing my ideas with other women—kept me walking on clouds.

I opened my practice while Susan, my beautiful daughter was still in diapers. With all my trials and tribulations behind me...I can now share the joys with you. But you must keep out talks secret.

I'll only let so much of my knowledge out to the public. Like the Five Reasons That Keep A Healthy Woman From Getting Pregnant.

A Toxic Body- By using the science of Biotherapeutic's, I can reverse the toxicity of your system. Everyone has a toxic build up. Too high and you won't get pregnant. Biotherapeutic's will repair you weakened system, making you stronger and more able to get pregnant.

Internal Organ Weakness- All your organs need to be strong and functioning well. The most important two for pregnancy are the kidney and spleen. I'll do a simple test to see if there are any issues and put you on natural remedies if need be.

Too Short A Menstrual Cycle-In our talks, I'll find out how long your cycle is. A short cycle will not supply enough blood to your uterus. Don't worry; we can get you on the proper cycle.

Improper Circulation-Like all babies, humans like a warm nest. If your internal core temp is too cold...we need to warm you up. I'll ask if you suffer from cold hands and feet. This is an indicator of a cold core.

The Colour of Your Menstruate-It has to be bright red. Any other shade-like dark red means you will have difficulty in conceiving. I have the plan to remedy any issues with incorrect colour.

Okay you've been patient. I like that-we have something in common already. Now I'm going to ask you to listen to Nancy's story. There's an important message in it just for you.

I grew up on a military base. Tons of kids and we ran all day in the woods Got into things we shouldn't have. Like prowling on the base where there were chemical storage drums and bombed out tanks. Brought home more than once by the military police. . Things weren't great at home, so after high school I moved to Nova Scotia. Married a writer and settled down. I wanted a family. I'd been surrounded by kids all my life. We tried but nothing seemed to work. Mark, my husband tried to console me but I could tell he was just saying what he thought I wanted to hear. We would discuss it for a bit and then he would disappear back into his library to work. I found out about Dr. ----- and went to see her. Filled out a questionnaire and then she asked me to join her in what she called the movie room. I sat with Dr.----- who basically held my hand as I cried. We watched her own tape of previous clients. I listened as they told stories similar to mine and then a pause and they re-appeared on screen with the child they had conceived with the help of Dr. Tina -----. I begged her right then and there to help me. I was so happy when she agreed. I wanted to take a copy of the video with me but the answer was...this is special and only for the eyes of those who truly want to become pregnant. I urge you to make an appointment and see for yourself what a miracle truly is. My son Jason is living proof.

*Nancy _____
Vogler's Cove
Maine*

I'm sure that Nancy's story has elements that you can relate to. Disappointment, anxiety and utmost joy. I get pictures of all Jason's birthday parties. I've got a special book that I keep on my desk-full of pictures. Children that I helped bring into the world.

Natural Solutions Based On Your Individual Needs

After you complete the questionnaire that I have prepared for you-watched my special video..you'll be on your way to an incredible journey. There will be no drugs, expensive In vitro-Fertilization or assembly line procedures. You will be given your own plan for success. It won't take that long. I keep accurate records and 37% of my patients are pregnant within 67 days. Now if that is not convincing enough-let me mention that 82% are pregnant within six months.

- ☺ **You will be informed and listened to. All your questions will be answered.**
- ☺ **You'll know why you haven't become pregnant and how you will.**
- ☺ **I'll be with you, every step of the way. Your guiding light to motherhood.**

All your fears will be put to rest. We'll get your husband involved and excited to be part of the whole process. Emotionally, you'll both be ready. This greatly improves the chance of conception happening rapidly.

See what Kelly has to say:

My husband always complained about my cold feet in bed. I like to cuddle and when I did, he would scream and jump out of bed. My feet were often like blocks of ice. Dr. ----

- explained about core temp and got my internal body temp regulated. Dave really likes to cuddle now.

When we tried to conceive, Dave was not the most compassionate person. He had a lot of emotional baggage from childhood. Dr.----- got him involved. She even showed him the video. Wow, I've never seen him really cry before. After that, Dr. ----- showed him the plan for pregnancy and gave him some reading material. Kind of like homework which is great cause Dave is a teacher. He worked with me and charted all the things that Dr.----- had instructed him to do. When Amy was born, he cried buckets again. I know it was the happiest moment in our lives. I cannot wait to get pregnant again.
